-- The MAILING DATE of this communication appears on the cover sheet with the correspondence address --

Period for Reply

A SHORTENED STATUTORY PERIOD FOR REPLY IS SET TO EXPIRE 3 MONTH(S) FROM THE MAILING DATE OF THIS COMMUNICATION.

- Extensions of time may be available under the provisions of 37 CFR 1.136(a). In no event, however, may a reply be timely filed after SIX (6) MONTHS from the mailing date of this communication.
- If the period for reply specified above is less than thirty (30) days, a reply within the statutory minimum of thirty (30) days will be considered timely.
- If NO period for reply is specified above, the maximum statutory period will apply and will expire SIX (6) MONTHS from the mailing date of this communication.
- Failure to reply within the set or extended period for reply will, by statute, cause the application to become ABANDONED (35 U.S.C. § 133). Any reply received by the Office later than three months after the mailing date of this communication, even if timely filed, may reduce any earned patent term adjustment. See 37 CFR 1.704(b).

DETAILED ACTION

1. Claims 1-19 and 21-24 are rejected under 35 U.S.C. 103(a) as being unpatentable over Costanzo '312 in view of Takino et al or Itoh et al.

In figures 18-22 of Costanzo, mat-top chain links with first rollers in the cavities are taught.

Both Takino et al and Itoh et al teach using a rotating roller (12 or 1, respectively) to rotate a diverting article supporting roller (4 or 2, respectively) that is inclined to the initial direction of article movement. It would have been obvious to use rotating rollers 12 of Takino et al or 1 of Itoh et al to rotate rollers 188 of Costanzo as they pass in place of strips 185 of Costanzo.

With regard to claim 7, roller rotating surfaces 185 may be vertically adjustable as discussed in column 7, lines 2-8. With regard to claims 8 and 18, the design of the vertical displacement means is immaterial to the operation of the system.

2. Claims 20, 25 and 26 are rejected under 35 U.S.C. 102(b) as being anticipated by Costanzo'312.

The use of rubber-like material for strips 185 reduces slippage.

3. Claims 21-24 are rejected under 35 U.S.C. 112, second paragraph for being indefinite due to the lack of a proper antecedent for "second roller".

4. The drawings are objected to under 37 CFR 1.83(a). The drawings must show every feature of the invention specified in the claims. Therefore, the vertical displacement means of claims 8 and 18 must be shown or the feature(s) canceled from the claim(s). No new matter should be entered.

Corrected drawing sheets in compliance with 37 CFR 1.121(d) are required in reply to the Office action to avoid abandonment of the application. Any amended replacement drawing sheet should include all of the figures appearing on the immediate prior version of the sheet, even if only one figure is being amended. The figure or figure number of an amended drawing should not be labeled as "amended." If a drawing figure is to be canceled, the appropriate figure must be removed from the replacement sheet, and where necessary, the remaining figures must be renumbered and appropriate changes made to the brief description of the several views of the drawings for consistency. Additional replacement sheets may be necessary to show the renumbering of the remaining figures. The replacement sheet(s) should be labeled "Replacement Sheet" in the page header (as per 37 CFR 1.84(c)) so as not to obstruct any portion of the drawing figures. If the changes are not accepted by the examiner, the applicant will be notified and informed of any required corrective action in the next Office action. The objection to the drawings will not be held in abeyance.

5. Costanzo et al '937 and Costanzo '323 are pertinent.
6. Any inquiry concerning this communication should be directed to Joseph E. Valenza at telephone number (703) 308-2577. Amendments may be faxed to (703) 872-9306. My normal work week is Monday through Thursday.
